

Forex Traders are Exploiting the **Markets for Huge Profits....** And They Don't Want You to Know How **EASY** It Is!

They want to maintain the illusion of being a "sophisticated trader" - they mostly do this to impress their friends and families...

Let me show you how to grab your own piece of this multi-trillion US dollar Forex trading pie?

The image is a composite of three elements. On the left is a screenshot of a Wells Fargo account summary showing an available balance of 893,912.46. On the right is a screenshot of a Wachenia Online Services account page showing a balance of 531,218.63. In the center is the logo for 'Forex Daily Pro Trading System', which consists of a stylized red and black triangle pointing upwards and to the right, with the text 'Forex Daily Pro Trading System' to its right.

For The SA Chamber of Entrepreneurs

Dear Friend,

Forex trading is an excellent way to make additional income in your spare time, even if you don't have much experience right now.

That is how we started – with small paydays.

A typical Day

Time	Type	Size	Symbol	Price	S / L	T / P	Price	Swap	Profit
05.27 11:00	sell	50.00	usdcad	0.97816	0.00000	0.00000	0.97549	0.00	13 685.43
05.27 13:19	sell	25.00	usdcad	0.97685	0.00000	0.00000	0.97549	0.00	3 485.43
05.30 07:45	sell	25.00	usdcad	0.97612	0.00000	0.00000	0.97549	0.00	1 614.57
05.30 09:01	sell	25.00	usdcad	0.97556	0.00000	0.00000	0.97549	0.00	179.40

But once you understand the system, it could absolutely replace the income from your day job.

You're probably here for one of the following three reasons...

- a) You don't know exactly what Forex is.
- b) You know a little about it, but want to know how to actually start trading.
- c) You've tried it in the past, but were not satisfied with the results.

Regardless of which scenario best fits you... you've come to the right place!

If you're tired of sitting on the sidelines and only hearing the stories of people making money in Forex, that's about to change forever.

I'm going to show you a simple system that YOU can use to make consistent profits from Forex trading, even if you've never done it before.

But first I need to WARN you...

This is BIG and this is REAL.

However, it's still a shame that some people have made Forex look like some sort of a fly-by-night operation. They've tried to sell it to the market with pure HYPE, and that's unfortunate, because it happens to be a perfectly legitimate investing strategy that has been around for decades.

According to Wikipedia, the DAILY turnover in global foreign exchange markets is about 4(four) TRILLION U\$ Dollars every day.

That's more money than most of us can comprehend.

Nevertheless, it shouldn't be too difficult to understand how Forex traders can easily make a nice living just skimming a TINY amount of the profits that are generated each day.

There's nothing "magical" about trading Forex. It's actually a fairly "normal" thing. It's a very basic way of doing business, and virtually anyone can do it.

I think the reason that the Forex trading world has gained a level of mystique, is because in recent years so many people have been quietly getting rich trading Forex using little more than their Internet connection.

If there's anything magical about Forex, that's it. It's the fact that anyone with an Internet connection can become a Forex trader and create a whole new lifestyle for him or herself.

I think part of the appeal of Forex is that it truly is easier than most other forms of trading and investing. Those who enter into the world of Forex trading soon discover...

Forex is More stable than the JSE & Easier to Manage than other trading Stocks!

When you think of Forex, many people immediately think of trading stocks but that's NOT the case. Forex is much different than trading stocks.

In fact, Forex trading is a more stable way for anyone to invest their money than being an active trader on the traditional stock markets.

Forex is also easier to understand, so that anyone with any experience level can take part in Forex trading.

Needless to say, you DON'T need to take any special college courses or take part in any highly expensive seminars to trade Forex!

By and large, Forex is much better for *the little guy* in terms of gaining an advantage when it comes to investing.

Here's the first key I want to reveal to you...

The Forex Market changes and trends quickly. If you want to trade successfully you need to learn to spot trends quickly!

Complicated charts cluttered up with all kinds of indicators might help you forecast the market. The market as it was the moment you made those charts, that is.

How is that going to help when the market changes on you? That's a huge waste of time, making long and complicated charts that can become irrelevant at the drop of a hat!

The plain truth is that improperly used technical indicators do not reflect those changes quickly enough to be of much value to most Forex traders. They lag behind the market just enough to cause some real problems.

If those indicators are the only tools at your disposal, you just don't have the tools you need to stay on top of the changes. You can't adapt. You'll be trading on a market that's already vanished.

Big Time Traders Don't Trade Like That!

The big dogs trade thousands of lots at a time, worth millions. They trade for banks, governments, and large corporations. They trade for people who do not accept failure.

The big time traders survive by being in the right place at the right time. They can't afford to be wrong! Big time traders are able to see major trends days and even weeks before they take place. They anticipate tomorrow's market, not yesterday's market.

They don't see ahead like that by relying on technical indicators and black box systems. They can't afford to waste that much time. They can't afford to be behind the market. They can't afford to be inflexible.

What do they do instead? They pay close attention to price action while finding major support and resistance levels!

The Biggest Mistake Most New Traders Make:

Back in the late 90's Forex wasn't an Internet sensation. There weren't hundreds of people trying to teach the "right" way to trade Forex and in the process confusing a fairly simple procedure.

That was a lot better than what we have today. What is being passed off as "good Forex trading advice" is usually nothing of the sort. Big time traders have it on the ball. The methods they use to trade Forex work. Their way is the real "right" way to trade.

The professionals make their trade decisions without relying on indicators and cluttered charts. Unlike what you probably have right now! They've got a system of scanning the market and timing their entries and exits that cuts right through the clutter.

New traders place way too much emphasis on finding the absolute “perfect” way to trade.

They often fall victim to **“Paralysis by Analysis”**.

Always analyzing, always thinking, and never acting. New traders who make this mistake find themselves drowning in a sea of data. **No decisions can be made because there is just too much information to base decisions on.**

Is this what's happening to you? You need to narrow your focus, and look at...

The Most Important Signals In Trading

Focusing on price action changes everything!

The **Forex Daily Pro Trading System [FDP]** is a guide to trading the Forex that relies on price action. It is a better way of trading the Forex than the popular systems of indicators and messy indecipherable charts.

The Central Focus of the **Forex Daily Pro** Trading System:

Price Action!

Nothing could be simpler. No need for all the cluttered charts. No need for clunky cumbersome technical indicators that don't even give you current market conditions.

Stop using those charts cluttered with indicators. They are not helping you. They're cluttering up your decision-making. You don't need them to be successful. So why would you want to use them?

The successful traders are using proven, time-tested trading techniques. You should too. Why would you not use the strategies that have been shown by professionals to be successful? Well now you can..

Conquer The Forex Market By Trading Like The Pros... With No Experience Required!

With our **Forex Daily Pro** Trading System your trades will improve overnight. What's more, you'll also stop stressing out about indicators and charts!

What could be more effective? A simple system that lets you see what the market is doing and, more importantly, where it is headed. I'd say that sounds better than indecipherable charts that take forever to make and longer still to read!

Many traders have used these same core strategies and were surprised by how simple it was. Make that pleasantly surprised, because their trades improved right away!

How Does It Work?

The **Forex Daily Pro** Trading System is built around the proven techniques of professional commercial traders. These principles have been shown to work time and time again.

Professional traders use them over and over again to make money on a consistent basis. The system is based on paying close attention to price action and risk control.

Global political events, monetary policies, economic reports, and other such external forces drive volatile currency price fluctuations. We are traders, though, not economists! All we care about is profiting from the volatility that is the result of these global events!

YES... Today's market volatility has created the opportunity for Forex traders to create HUGE profits day after day!

The Forex Daily Pro Trading System enables you to keep up with the changes of the ever-volatile Forex market. It lets your trading strategy be flexible, and adapt itself to the changing market conditions.

Our system lets you easily pinpoint entry and exit points. This is why our system works better than systems that depend on lagging indicators. Those other systems just don't stack up.

You Can Increase Your Trading Odds Even Further

To improve the odds even further, the Forex Daily Pro Trading System combines price action with a select group of special technical indicators and chart formulations. These are technical indicators that have consistently proven to be reliable.

So how does this help?

There's just no better way! What could possibly make your success easier than being able to anticipate what the market is going to do?

There will no longer be any guesswork. No more trying to use indicators of five minutes ago to make the trade decisions of right this moment.

If you are trading Forex without the guidance of price action, then your trades are in danger. You're walking out into tricky territory without a map, or guidebook, or GPS. You're flying blind. And that's not a situation you want to find yourself in!

The **Forex Daily Pro Trading System** uses price action, select indicators, & Other Secrets That Are Easy To Understand...

The **Forex Daily Pro Trading System** really works. It can turn disillusioned Forex traders into true believers.

Hundreds of people have turned to the **Forex Daily Pro Trading System**. The usual "black box" methods just don't work for most traders.

The **Forex Daily Pro Trading System** does! One person even offered a blank check to learn its secrets!

There aren't enough hours in the day to teach all of these people one on one.

That's why we created the **Forex Daily Pro Trading System** video course.

It will guide you through the whole system. Step by step you will learn how to trade Forex, and how to apply the strategies of this system to your trading. Our video course breaks it all down and makes it easy to understand.

You aren't going to master Forex by trial and error. It's almost impossible to learn that way, unless you want to have a VERY expensive education. You may already be aware of that, having learned the hard way.

There's just too much involved for trial and error to work. You need something that gives you an edge.

Trying to "figure it out on the fly" is too risky.

It's unlikely that you'll succeed if you have to keep reinventing the wheel. And there's no way to succeed if every lesson you learn costs you more of your capital.

You won't master it with the wrong technical indicators either. They are slow, difficult, and don't let you predict the market. They lag behind the market too much to be of real value to the investor looking for success on the Forex market.

You need a system that WORKS, and it needs to be a system that you can understand.

We encourage you to grab our course today, and learn the simple way to make money as a Forex trader.

Sincerely,
